

# Nutrition, Oral Health & Active Play Policy

Working in partnership with Cancer Council Victoria and Dental Health Services Victoria, ELAA has aligned this Procedure to the key Procedures and guidelines of the Healthy Early Childhood Services Achievement Program and Smiles 4 Miles program.

## Purpose

Mallee Track Health and Community Services Early Years acknowledges the importance of healthy eating, oral health and physical activity and its contribution to good health and overall wellbeing.

This Procedure provides guidelines to:

- promote a healthy lifestyle and support children, staff, educators and families at the service to eat nutritious food, maintain oral health and participate in physical activity and active play
- ensure national and state guidelines and recommendations about nutrition, oral health and physical activity are met
- ensure that the dietary, developmental and cultural needs of children and families are taken into consideration when planning menus and implementing nutrition, oral health and active play activities
- Ensure the safe storage and preparation of food.

## Procedure Statement

### Values

- Mallee Track Health and Community Services Early Years is committed to:
- creating Procedures and practices that promote a healthy lifestyle and ensure national and state guidelines and recommendations about safe food preparation, nutrition, oral health and physical activity are met
- ensuring the buildings, grounds and facilities enable healthy eating, oral health and active play
- creating a culture in which all community members are respectfully supported to eat healthily, maintain good oral health and be active
- providing children with formal and informal opportunities to learn about food, nutrition, oral health and health messages about physical activity
- ensuring staff and educators have access to resources and support for their own healthy eating, oral health and physical activity
- Engaging families, the service community and expert organisations in the promotion and implementation of healthy eating, oral health and active play initiatives.

### Scope

This Procedure applies to the approved provider, persons with management or control, nominated supervisor, persons in day-to-day charge, early childhood teachers, educators, staff, students, volunteers, parents/guardians, children, and others attending the programs and activities of Mallee Track Health and Community Services Early Years, including during offsite excursions and activities.

and/or other medical conditions on enrolment or on initial diagnosis					
18. Ensuring risk minimisation plans are developed for children with medical conditions that can be impacted by food	R	R			
19. Providing details of specific nutritional/dietary requirements, including the need to accommodate cultural or religious practices or food allergies, on their child's enrolment form, and discussing these with the nominated supervisor prior to the child's commencement at the service, and if requirements change over time ( <i>refer to Anaphylaxis Procedure, Asthma Procedure and Diabetes Procedure</i> )				✓	
20. Communicating regularly with ECT, educators/staff regarding children's specific nutritional requirements and dietary needs, including food preferences				✓	

## Nutrition, Oral Health & Active Play Policy

21. Ensuring that fresh drinking water (preferably tap water) is readily available at all times, indoors and outdoors, and reminding children to drink water throughout the day, including at snack/lunch times ( <i>Regulation 78(1)(a)</i> ) (Only tap water and plain milk are encouraged.)	R	√	√		√
22. Ensuring that children can readily access their own clearly labelled drink containers (where this is a service practice)		√	√	√	√
23. Ensuring that best practices are followed in relation to bottle feeding and sipper cups as outlined in the NHMRC Infant Feeding Guidelines. This includes not putting an infant to sleep while drinking from a bottle, and a cup be introduced around 6 months to teach infants the skill of sipping from a cup.	√	√	√		√
24. Ensuring oral hygiene practices are undertaken at the service where appropriate	√	√	√		√

## Nutrition, Oral Health & Active Play Policy

25. Providing opportunities for children to learn about, and develop skills for oral health through the educational program, including age-appropriate tooth brushing		√	√	√	√
26. Ensuring that food and drinks are available to children at frequent and regular intervals throughout the day ( <i>Regulation 78(1)(b)</i> )	<b>R</b>	√			
27. Providing food and drinks at regular intervals, and encouraging children to actively participate in, and enjoy, snack/mealtimes without feeling rushed		√	√		√
28. Ensuring educators and staff are supported to access a range of resources and professional development to increase their capacity to promote healthy eating, oral health and active play initiatives for children	√	√			
29. Registering and engaging the service with the	√	√			

## Nutrition, Oral Health & Active Play Policy

Achievement Program ( <i>refer to Sources</i> )					
30. Providing families with information and strategies to promote healthy eating, oral health and active play and how to access relevant services (including local dental clinics)	√	√	√		
31. Developing links with local and regional health services, community organisations and businesses that provide expertise, resources and support for healthy eating, oral health and active play	√	√	√		
32. Ensuring that food and drinks are not used as an incentive or reward	√	√	√		√
33. Ensuring staff and educators are supported by having healthy food options in the staff room, for staff meetings and for professional learning (if applicable)	√	√			
34. Ensuring that discretionary food and drinks do not appear in any sponsorship, fundraising or marketing activities	√	√			

## Nutrition, Oral Health & Active Play Policy

35. Considering this Procedure when organising excursions, service events and any sponsorship or marketing opportunities	√	√	√		
36. Ensuring celebrations and other service events promote healthy food options and limit discretionary options	√	√			
37. Developing and reviewing guidelines for celebrations, fundraising activities and other service events in consultation with educators, staff, parents/guardians and families to focus on healthy alternatives	<b>R</b>	√			
38. Ensuring the layout of the grounds and buildings is inclusive of the diversity and abilities of all children and encourages physical activity and movement	<b>R</b>	√			
39. Ensuring recommendations about physical activity and screen time from the Australian 24-Hour Movement	<b>R</b>	√	√		

## Nutrition, Oral Health & Active Play Policy

Guidelines for the Early Years (Birth to 5 Years) are met					
40. Ensuring children are not sedentary or inactive for more than 1 hour at a time, with the exception of sleeping		√	√		√
41. Supporting children to develop collaboration skills during play		√	√		√
42. Ensuring that children are taught how to use equipment safely	<b>R</b>	√	√		√
43. Planning and providing active play and movement experiences that are age-appropriate, inclusive of diversity and abilities and support children to develop fundamental movement skills		√	√		√
44. Considering opportunities for children to be physically active indoors, particularly in adverse weather conditions		√	√		√
45. Dressing their child/ren so they can engage safely in active play		√	√	√	√
46. Ensuring service facilities and	<b>R</b>	√

equipment enable active travel and road safety for children, staff, educators and families					
47. Supporting, promoting and encouraging active travel to and from the service (Regulations 100 - 102)	√	√	√	√	√
48. Providing age-appropriate traffic safety education, including pedestrian and passenger safety to both children and parents/guardians at the service	<b>R</b>	√	√		
49. Using and promoting local parks, bike paths and recreation facilities, where appropriate, to encourage physical activity.	√	√	√		
50. Ensuring there is a suitable space for breastfeeding and storage of breast milk is available	<b>R</b>	√			
51. Ensuring space and facilities are available to allow staff and educators to store and prepare healthy food safely	<b>R</b>	√			
52. Ensuring healthy eating, oral health and active play information and	<b>R</b>	√			

# Nutrition, Oral Health & Active Play Policy

Procedure requirements are included in the educator and staff induction					
53. Ensuring educators and staff are supported to be physically active and minimise sedentary behaviour, both inside and outside of work hours	R	√			
54. Supporting students and volunteers to comply with this Procedure while at the service	R	√			
Where food is provided at the service:					
55. Ensuring the provision of nutritionally-balanced and culturally-sensitive meals, in line with the Australian Dietary Guidelines and Infant Feeding Guidelines, as required	R	√			
56. Ensuring that staff who are responsible for menu planning participate in regular nutrition and safe food handling training, and are kept up to date with current research, knowledge and best practice	R	√			

## Nutrition, Oral Health & Active Play Policy

57. Ensuring that food and drink provided by the service is nutritious, varied, adequate in quantity and appropriate to children's growth and development, and meets any specific cultural, religious or health needs ( <i>Regulation 79(1)</i> )	R	√			
58. Ensuring the service menu has been assessed by the Healthy Eating Advisory Service's FoodChecker tool and meets the criteria determined	R	√			
59. Ensuring that a weekly menu is displayed in a location accessible to parents/guardians, and that it accurately describes the food and drinks to be provided by the service each day ( <i>Regulation 80(1)</i> )	R	√			
60. Displaying menus, sharing recipes and encouraging feedback about the food provided at the service.	R	√			

### Background

There are many benefits to promoting a healthy lifestyle in early childhood education and care settings, including the positive impact this has on each child's learning and development. Being made aware of positive eating behaviour, oral hygiene practices and the importance of physical activity from an early

# Nutrition, Oral Health & Active Play Policy

age can instil good habits that will remain throughout a person's life. Staff are well placed to build this awareness among children and their families, while respecting lifestyle choices, and cultural and religious values.

As a health promoting service it is recognised that every member of the service impacts on children's health. Children, staff, educators and families can be supported to eat healthily, maintain good oral health and be physically active through teaching and learning opportunities, Procedures, creating a safe and healthy physical and social environment and developing community links and partnerships.

## **Nutrition**

The foods we eat provide our body with the nutrients we need to stay healthy. Good nutrition is the balanced eating of a variety of foods and is especially important for children as they require a large amount of nutrients for growth and development. Research has shown that, when offered a variety of healthy foods, children can and do make good choices. It is also important to provide preschool children with a good foundation in healthy eating, as most children have formed lifelong eating habits before they reach school age.

## **Oral health**

Tooth decay is Australia's most prevalent health problem despite being largely preventable. It is important to note that oral health promotion is complementary to promoting healthy eating.

Oral health behaviours have a major influence on children's health and wellbeing and a direct impact on their growth and development. Oral diseases can negatively affect individuals through pain, discomfort, general health and quality of life. Poor oral health can limit a child's capacity in biting, chewing, smiling, speaking, and psychosocial wellbeing. The main oral health condition experienced by children is tooth decay affecting over half of all Australian children, making it five times more prevalent than asthma.

## **Active play**

Active play (*refer to Definitions*) develops a strong and healthy body, builds motor and co-ordination skills, creates a sense of wellbeing and helps protect children from disease. Active play is about moving, being and doing.

A strong sense of health and wellbeing, supported by good nutrition, oral health and an active lifestyle, can provide children with confidence, energy and optimism that will contribute to their ability to concentrate, co-operate and learn (*Belonging, Being & Becoming – The Early Years Learning Framework for Australia, – refer to Sources*). Learning about healthy lifestyles, including nutrition, oral health and active play, links directly to Outcome 3 in both the *Early Years Learning Framework* and the *Victorian Early Years Learning and Development Framework* (*refer to Sources*).

The Australian Government has guidelines, recommendations and resources for healthy eating and physical activity in early childhood settings including the *National Health and Medical Research Council's Australian Dietary Guidelines and Infant Feeding Guidelines*, the *Get Up & Grow: Healthy Eating and Physical Activity for Early Childhood* resources and the *National Physical Activity Recommendations for Children 0-5 Years* (*refer to Sources*). Practical, healthy eating advice is also available to early childhood services and schools via a telephone advice line: the *Victorian Healthy Eating Advisory Service* (*Healthy Eating Advisory Service – refer to Sources*), run by *Nutrition Australia*. Early childhood education and care services can also register and implement the *Achievement Program* (*refer to Sources*). This program is designed to create safe, healthy and friendly environments for children, staff educators and families, by promoting physical, mental and social health and wellbeing.

## **Progressive mealtimes**

Prompt Doc No: MTH0142159		Page 15 of 19

# Nutrition, Oral Health & Active Play Policy

In recognising children as active participants in their own learning, children should be encouraged to make meaningful decisions about elements of their own education and care. Incorporating progressive mealtimes into the educational program allows children to choose to eat when they are hungry, rather than according to a timetable. Children can gather in small groups to enjoy meals together, without interrupting the needs and play of others. This also encourages quieter, more social and meaningful interactions at mealtimes and allows for a smoother flow throughout the day. Children can make decisions based on their own needs, and can be supported to access food and water throughout the day by educators/staff, who actively participate in mealtimes.

A decision with respect to incorporating progressive mealtimes into the educational program must take into account the needs of all children at the service, particularly children with specific medical conditions such as diabetes. The National Regulations require services to ensure that children with medical conditions are able to participate fully in the educational program and are not discriminated against in any way.

## Legislation and Standards

Relevant legislation and standards include but are not limited to:

- Australia New Zealand Food Standards Code
- Child Wellbeing and Safety Act 2005 (Vic)
- Disability Discrimination Act 1992 (Cth)
- Education and Care Services National Law Act 2010
- Education and Care Services National Regulations 2011 including Regulations 77–78, 79–80 (if the service provides food), 168
- Equal Opportunity Act 2010 (Vic)
- Food Act 1984 (Vic)
- National Quality Standard including Quality Area 2: Children’s Health and Safety
- Occupational Health and Safety Act 2004
- Quality Area 6 – Collaborative Partnership with families and communities
- Quality Area 7 – Governance and Leadership

## Definitions

The terms defined in this section relate specifically to this Procedure. For regularly used terms e.g. Approved provider, Nominated supervisor, Notifiable complaints, Serious incidents, Duty of care, etc. refer to the Definitions file of the Policy Works catalogue.

**Active play:** Play that involves large muscle-based activities that are essential for a child’s social, emotional, cognitive and physical growth and development incorporating:

- child-initiated active play, which is developed by the child through exploration of the outdoor environment, equipment and games
- adult-guided active play which encourages children’s physical development through promoting movement skills in a non-competitive environment
- Physical activity, which includes sport, incidental exercise and many forms of recreation.
- Active travel, which includes walking, cycling, scootering or any similar transport where physical activity is used to travel.

**Adequate supervision:** (In relation to this Procedure) supervision entails all children (individuals and groups) in all areas of the service, being in sight and/or hearing of an educator at all times including during toileting, sleep, rest and transition routines. Services are required to comply with the legislative requirements for educator-to-child ratios at all times. Supervision contributes to

# Nutrition, Oral Health & Active Play Policy

protecting children from hazards that may emerge in play, including hazards created by the equipment used.

Adequate supervision refers to constant, active and diligent supervision of every child at the service. Adequate supervision requires that educators are always in a position to observe each child, respond to individual needs, and immediately intervene if necessary. Variables affecting supervision levels include:

- number, age and abilities of children
- number and positioning of educators
- current activity of each child
- areas in which the children are engaged in an activity (visibility and accessibility)
- developmental profile of each child and of the group of children
- experience, knowledge and skill of each educator
- need for educators to move between areas (effective communication strategies).

**‘Discretionary’ foods and drinks:** Food and drink items that are high in fat, sugar and salt, and that contain minimal vitamins, minerals or fibre. These can also be referred to as ‘sometimes’ foods and drinks. Examples of discretionary food and drinks include:

- chocolate, confectionery, jelly
- sweet biscuits, high fat/salt savoury biscuits, chips
- high sugar/high fat cakes and slices
- cream, ice cream
- deep fried foods (e.g. hot chips) and pastry-based foods (pies, sausage rolls and pasties)
- most fast food and takeaway foods
- some processed meats (e.g. sausages, frankfurts/hot dogs, salami, strasbourg, devon, some commercial chicken nuggets and fish fingers)
- soft drinks, fruit juice and fruit drinks, cordial, sports drinks, energy drinks, flavoured milk and flavoured mineral water

**Healthy eating:** Describes eating patterns that provide all the recommended nutrients for growth and development, and good health and wellbeing, now and in the future. It also refers to preparing, serving and eating food in a way that recognises its importance as a social and cultural activity.

**Nutrition:** The process of providing or receiving nourishing substances.

**Oral health:** The absence of active disease in the mouth. Oral health is fundamental to overall health, wellbeing and quality of life. A healthy mouth enables people to eat, speak and socialise without pain, discomfort or embarrassment.

**Food Literacy:** Food literacy is “a collection of inter-related knowledge, skills and behaviours required to plan, manage, select, prepare and eat food to meet (dietary) needs”
